

14" wide and 30 feet per minute

No added costs, no added waiting. IntoPrint's RF1430 digital finishing system is a roll-to-roll converting system that laminates, cuts, strips and slits your labels in one pass and cuts any custom shape on-demand. The RF1430 uses the same digital vector files that you would normally send to your flexible die suppliers. Our technology will make you more profitable, and more competitive, when it comes to delivering shorter runs and customization to your customers.

Print to cut registration is accomplished via the SMARTMark Optical Registration System. The computer-driven cutting technology is capable of cutting multiple depths within the same file, allowing for perforations or multi-layer applications.

The new IntoPrint RF1430 digital finishing system is the answer to every label converter's need for finishing short runs of labels with custom shapes and quick delivery to their customers. The IntoPrint RF1430 is a high-speed roll-to-roll digital converting system that allows users to laminate, die cut, strip and slit custom labels in one production pass. The IntoPrint RF1430 can die cut any custom shape on demand – without the inherent costs, delays and limitations of more conventional die cutting processes – right from Adobe Illustrator or Corel Draw using the same vector file that would normally be sent out for die manufacturing.

The IntoPrint RF1430 comes standard with a touch screen interface that makes it easy to set up and operate. Simple user adjustments allow your operator to easily fine tune the operation of the machine to suit even the most difficult label designs. Sized to accommodate most label converters' needs - it can convert printed materials from any digital or analog print process.

One-up your competitors with IntoPrint's RF1430 digital finishing system. It's estimated that 25-30% of all jobs in the U.S. label-printing industry are run lengths of 5,000 linear feet or less. Higher volumes of short runs keep driving installation rates of digital label presses; however, the majority of digital press users are still die-cutting offline using traditional flexible dies and magnetic cylinders.

The IntoPrint RF1430 digital label finisher provides end users with their own "in house" label finishing solution that reduces their inventory requirements and costs. For the professional converter, the IntoPrint RF1430 enables them to provide their current customers with "value added" capabilities while responding to the increasing demand for high quality, short run, custom labels.

RF1430 Finisher	
Contour Cutting	Full HPGL vector cutting compatible with SMARTMark opto-electrical line sensor
Speed	Up to 30 feet/min
Max Frame Length	36 inches
Max Input Roll Diameter	14 inches
Max Output Roll Diameter	14 inches
Cutting Technology	Pivoting carbide tip - 30, 45 & 60 degree
Media Core Dimensions	3 in
Dimensions (WxDxH)	59 in X 32 in X 58 in
Weight	450 lbs
Power Requirement	900 watts 100-132 VAC / 47-63 Hz or 180-240 VAC / 47-63 Hz
Warranty	Limited 1 year
Software	
Adobe Illustrator Plug In	Direct Cut
Touchscreen Controls	
Software is compatible with Windows 7, 8 and 10 operating systems
