

8.5" wide and 20 feet per minute

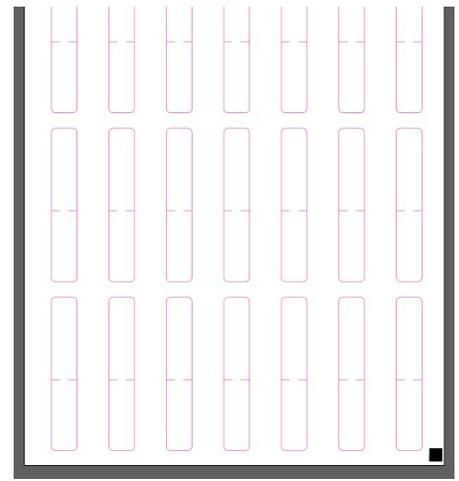

Print to cut registration is accomplished via the SMARTMark Optical Registration System. The computer-driven cutting technology is capable of cutting multiple depths within the same file, allowing for perforations or multi-layer applications.

The Intoprint RF8520 Digital Label Finisher is a complete, affordable digital finishing solution that laminates, cuts without dies, strips, slits, and re-winds your labels. The Intoprint RF8520 digital label finisher brings high-end performance and productivity to narrow web. A simple, smooth, transport mechanism, allows finishing speeds of up to 20 feet per minute. Its large infeed and rewind capacity coupled with quick setup capacity is perfect for today's short run environment.

The new IntoPrint RF8520 digital finishing system is the answer to every label converter's need for finishing short runs of labels with custom shapes and quick delivery to their customers. The IntoPrint RF8520 is a high-speed roll-to-roll digital converting system that allows users to laminate, die cut, strip and slit custom labels in one production pass. The IntoPrint RF8520 can die cut any custom shape on demand – without the inherent costs, delays and limitations of more conventional die cutting processes – right from Adobe Illustrator using the same vector file that would normally be sent out for die manufacturing.

Additional features are continuous cutting to provide a smooth slit before the rewind and larger 13" input and output roll capabilities for longer unattended operation. Automatic tensioning further reduces operator intervention. Simple user adjustments allow your operator to easily fine tune the operation of the machine to suit even the most difficult label designs. Sized to accommodate narrow width rolls - it can convert printed materials from any digital or analog print process.

One-up your competitors with IntoPrint's RF8520 digital finishing system. It's estimated that 25-30% of all jobs in the U.S. label-printing industry are run lengths of 5,000 linear feet or less. Higher volumes of short runs keep driving installation rates of digital label presses however the majority of digital press users are still die-cutting offline using traditional flexible dies and magnetic cylinders.

The IntoPrint RF8520 digital label finisher provides end users with their own "in house" label finishing solution that reduces their inventory requirements and costs. The IntoPrint RF8520 digital label finisher is a perfect companion to a variety of narrow-web digital output devices, including IntoPrints RP8525 and RP85100 digital label printers. RF8520 is another affordable digital production tool, that allows you to respond to the increasing demand for high quality, short run, custom labels.

RF8520 Finisher	
Contour Cutting	Full HPGL vector cutting compatible with SMARTMark opto-electrical line sensor
Speed	Up to 20 feet/min
Max Frame Length	22 inches
Max Input Roll Diameter	13 inches
Max Output Roll Diameter	13 inches
Cutting Technology	Pivoting carbide tip - 30, 45 & 60 degree
Media Core Dimensions	3 in
Dimensions (WxDxH)	60 in X 39 in X 25 in
Weight	300 lbs
Power Requirement	500 watts 100-132 VAC / 47-63 Hz or 180-240 VAC / 47-63 Hz
Connectivity	Ethernet or USB
Warranty	Limited 1 year
Software	
Adobe Illustrator Plug In	Direct Cut
Touchscreen Controls	
Software is compatible with Windows 7, 8 and 10 operating systems
